

## 2.1.6 Release Notes

### Features

This update comes with a host of new features and improvements for the Canvas. As always, we welcome and encourage any feedback you might have!

- **Snapping Tools:** new snapping options in the Canvas for precision design and quality-of-life.
- **Volume Reports:** adjustable PDF reports for triangulation volumes in the Canvas.
- **Profile Viewer:** an interactive panel for viewing the elevation profiles of polylines in the Canvas.
- Added an option in the canvas to generate a grid with its points at a fixed elevation.
- Added an option to orthomosaic transforms to create a single-JPG output.

### Improvements

- Various UI modernizations and speed improvements.
- Orientation, interactivity, and performance improvements to previews on project Overview page.
- Processing stability improvements for long corridor projects.
- Added "CZECH/Krovan-JTSK-1710 (GRID) -E, -N" coordinate system option.
- Other miscellaneous small improvements and tweaks.

### Fixes

- Various UI appearance fixes and adjustments.
- Refinements to Project Report area calculations and reference point images.
- Improvements to multithreading stability during preprocessing on machines with limited memory.
- Other miscellaneous small bug fixes.
